

Learning Pi

Personal Improvement

The newly developed app.

The Learning Pi app is available as a free download from the Google Play and Apple App store. Once downloaded you can login with the email address you have used for Arbor. If you need to reset your password this can be done here:

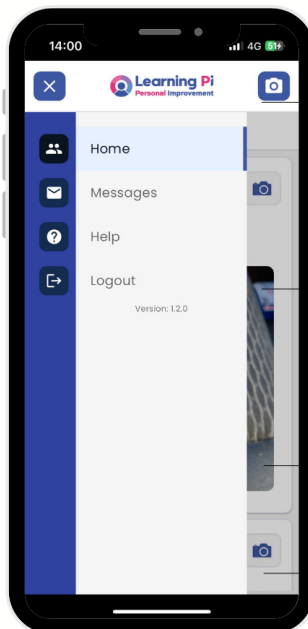

<https://learningpi.org/forgot-password>

App Features

- Messaging
- Snap and Share
- Live feed

Features to be added after launch

- Assessment Data
- White Book Activities

● Snap and Share

Parents can use the App to take or upload photos of children demonstrating our Learning Characteristics (hexagons).

● Messaging

A simple messaging app where parents can send "book bag messages" to class teachers and teachers can send out individual and bulk messages to their class.

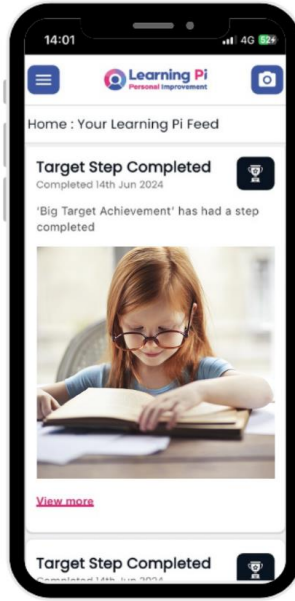

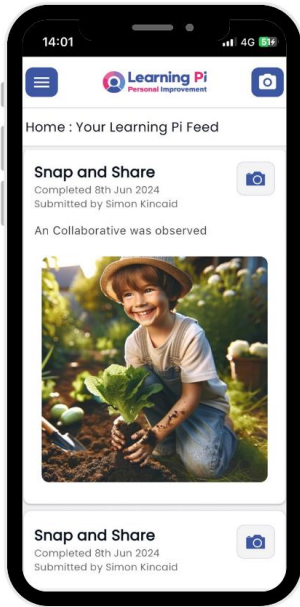

● Live feed

Quickly see recent activities and Snap and Shares.

● Notifications

Push notifications to direct parents or teachers to the app.

Live feed

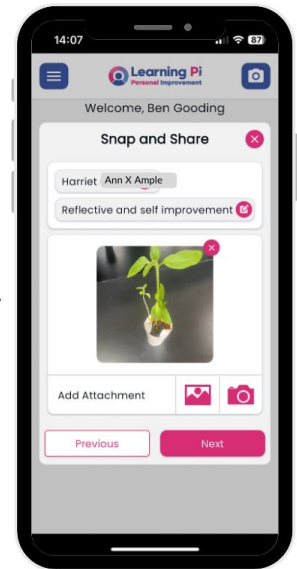

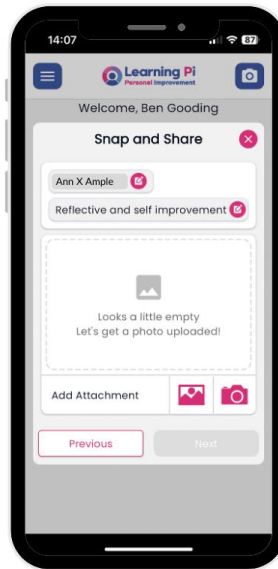

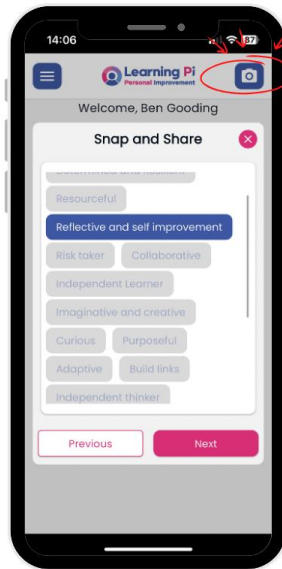

The app's home screen has a live feed.

Here you will find any Snap and Share's uploaded by your child's teacher and any targets completed.

Snap and Share

Snap and Share is accessed from the camera logo in the top right hand corner. Here children/parents can share their home learning with their class teacher and class in three simple steps.

Messages

The messaging function is accessed from the toolbar and allows parents to send short, succinct messages to the class teacher to replace 'book bag notes'.

For example "Tommy has lost his homework, can you give him another copy please. Thank you."

Parents will also receive messages sent from their child's teacher - notifications and emails are sent to direct you to these.
